Neighborhood Notification: Traffic Lane Changes Pilot Osborn Road, 15th – 19th Avenues

As part of the Street Transportation Department's core mission, we strive to improve the City's roadways to create a safe and efficient transportation network.

This notification is to share with nearby stakeholders that the Street Transportation Department will be conducting a pilot test to evaluate a proposed traffic lane change on Osborn Road from 15th to 19th Avenues from February 10 through February 14, 2020. Traffic barricades will close the eastbound curb lane to simulate what effects the removal of a vehicle lane would have on traffic flow and safety.

This temporary closure will simulate a proposed change to reduce one eastbound vehicle lane and add bicycle lanes in both directions. This modification could have traffic calming and safety benefits. The bicycle lanes would add space between pedestrians and vehicles and the narrowed lanes could reduce speed and help guide traffic.

Upon completion of the pilot study, the Street Transportation Department will evaluate its findings as well as community feedback. A decision on permanent lane configurations will be published to the [project webpage](#) no later than mid-March.

Questions/Comments?

Community input is a critical component to this evaluation. We welcome and value your feedback. To submit comments, please visit phoenix.gov/streets/lanechanges/osborn.

If you have any questions or need additional information, please reach out to Nicolas Santiago, Traffic Engineer, at 602-495-7542.
